Personal Information

I am an assistant professor for cognition and design at the human-centred design department at TU Delft. My research focuses on using design to empower people in their complex relationship with technology through cognition awareness and cognitive augmentation.

Before joining TU Delft, I was a UX researcher at PwC's Experience Consulting Team in Germany, where I supported clients of different domains in creating products and services that are viable, feasible, desirable, and benefit society and the world at large. I hold a PhD from the Media Informatics Group at LMU Munich, Germany, working in Human-Computer Interaction (HCI) with a focus on designing for and with human cognition in mind. My work revolves around developing and evaluating technologies that seamlessly embed themselves into people's everyday lives and augment their cognitive capabilities. I have (co-)authored 25+ publications that have been cited 147 times as of today. With a background that combines cognitive psychology and computer science and my experience in a design-oriented industry team, I am skilled in applying user-centred research using qualitative and quantitative methods to design and evaluate technologies and applications.

Work Experience

Assistant Professor for Cognition & Design

TU DELFT, HCD, IDE (06/2022 - TODAY)

I am a tenured assistant professor for Cognition & Design in the Human-Centered Design department, Faculty of Industrial Design Engineering, working on cognition awareness and cognitive augmentation.

UX Researcher/Consultant

PWC EXPERIENCE CONSULTING (10/2021 - 05/2022)

I was a User Experience (UX) Researcher working as a Consultant at [PwC's Experience Consulting](#) Team. In interdisciplinary project teams, I applied and extended my knowledge of user-centered design methods in close collaboration with our clients from numerous industry sectors (e.g., medical domain, IT, etc.). My tasks concerned all phases of the user-centered design process, starting with initial requirement analyses, expert UX reviews, qualitative and quantitative UX research, and the creation and testing of prototypical applications.

Ph.D. Student / HCI Researcher

LMU MUNICH, MEDIA INFORMATICS GROUP (02/2017 - 09/2021)

I was a researcher with teaching responsibilities at the [Media Informatics and HCI Group at LMU](#). My research focused on investigating cognitive processes, including perception, attention, and memory. I was particularly interested in people's usage of mobile learning apps and designing strategies for embedding mobile learning in everyday settings. I applied my experience in designing and conducting experiments in interdisciplinary projects resulting in 20+ publications at international venues. I further supervised 27 bachelor and master theses, led student projects, and independently taught seminars and tutorials on various HCI topics.

Education

Ph.D. in Media Informatics and HCI (Dr. rer. nat), Grade Summa Cum Laude, excellent (02/2017 - 09/2021)

MEDIA INFORMATICS GROUP, LMU MUNICH, GERMANY

Thesis Title: "Embedding Mobile Learning Into Everyday Settings",
Supervisor: Heinrich Hußmann

External Reviewers: Gerhard Fischer & Tilman Dingler
Defense date: October 15th, 2021

Master of Science (M.Sc.) in Applied Cognition and Media Sciences, (see study program), Grade 1.5 excellent (10/2013 - 09/2016)

UNIVERSITY OF DUISBURG-ESSEN, DUISBURG, GERMANY

Focus: Human-Computer Interaction, Cognitive Psychology
Master Thesis: "Revision of a Recommender System for the Selection of Core Concepts in Lesson Planning"
Supervisor: H. Ulrich Hoppe

Bachelor of Science (B.Sc.) in Applied Cognition and Media Sciences, (see study program), Grade 1.9 good (09/2010 - 09/2013)

UNIVERSITY OF DUISBURG-ESSEN, DUISBURG, GERMANY

Focus: (Cognitive) Psychology, Statistics, Computer Science
Bachelor Thesis: "Using motion on hand-held devices for mid-transfer interaction with gaze acquired public content"
Supervisor: Jürgen Ziegler & Hans Gellersen

Bachelor Thesis Project / Research Stay (03/2013 - 06/2013)

INFOLAB21, LANCASTER UNIVERSITY, LANCASTER, UK

Project: Performed a gesture elicitation study for combining gaze and gesture input to interact with public digital content, implemented an Android application, and designed the UI.

Abitur, Grade 2.5 (good) (08/2001 - 06/2010)

GYMNASIUM HEISSEN, MÜLHEIM AN DER RUHR, GERMANY

Organization, Volunteering, and Community Activities

CHI Nederlands Network

MEMBER (2022 - TODAY)

I am actively contributing to the CHI NL network (<https://chinederland.nl/>). When joining TU Delft, I became an active member of CHI NL, the dutch SIGCHI chapter of the Netherlands. The network aims to facilitate collaboration among dutch HCI researchers and increase the visibility of our work in the international community. I contributed to the organization of the CHI NL event at CHI2023, which will take place in Hamburg, and supported Ujwal Gadiraju (EWI) in organizing a post-CHI event at TU Delft.

Guest Speaker & Keynotes

AT DOCTORAL COLLOQUIA AND WINTER SCHOOL

I was a guest speaker at the [DELFI Doctoral Colloquium in 2021](#) to advise early PhD students on finding a topic, creating a PhD roadmap and overcoming challenges. In 2022, I held a keynote at an internal doctoral colloquium organized by five German universities in Venice, Italy. In February 2023, I gave a presentation and conducted a workshop on cognition awareness and cognitive augmentation at a winter school organized by LMU Munich (topic: the future of work).

GermanHCI Network

CORE TEAM MEMBER (2017 - 2021)

One of five core team members of the GermanHCI organizing team (<https://www.germanhci.de/>). Since 2017, the GermanHCI team has accompanied the ACM CHI Conference on Human Factors in Computing Systems with the aim of creating a network of German HCI research groups to facilitate collaboration and increase the visibility of German HCI research in the international community. My responsibility was to represent our team, manage our network members (32 research labs of 20 different German universities), and acquire funding (sponsoring) for our event (17k+ in 2019). Due to the cancellation of the conference during the COVID-19 pandemic, I led the organization of the [Virtual German CHI Week](#), a one-week online event showcasing 113 publications through video presentations.

Conference Reviewing & Program Committee Member

FOR VARIOUS CONFERENCES AND JOURNALS (2017 - PRESENT)

I volunteered to peer-review submissions for conferences and journals, including but not limited to the ACM Conference on Human Factors in Computing Systems (CHI 2018-2022), ACM International Conference on Mobile Human-Computer Interaction (MobileHCI 2019-2022), ACM Conference on Intelligent User Interfaces (IUI 2020-2022), and Proceedings of the ACM on Interactive, Mobile, Wearable and Ubiquitous Technologies (IMWUT 2020). My reviews have received multiple special recognitions. I was further part of the program committee as Associate PC Chair for the Mensch und Computer Conference (MuC 2019 & 2022) and as Late-breaking work PC member for the ACM Conference on Human Factors in Computing Systems (CHI 2020 & 2021).

Conference Organization Committees

AT CHI, IUI, AND MUC (2017 - PRESENT)

I volunteered for the organizing committee of various international conferences. As [Associate Chair](#) (Subcommittee UX & Usability) at the ACM Conference on Human Factors in Computing Systems in 2023, I reviewed and supervised 14 papers. For the conference on Mobile and Ubiquitous Multimedia (MUM) in 2023, I will act as [Poster Chair](#), an opportunity for researchers to present early-stage and ongoing work. As [Program Co-Chair](#) for the Mensch und Computer (MuC) 2023, I am responsible for the scientific program of the largest European HCI conference. I already supported the MuC conference in the past: As [Social Media Chair](#) and as [Print & Social Media Chair](#) in 2019. In 2022, I was [Local Chair](#) for the International Conference on the Internet of Things (IoT) hosted at IDE. In close collaboration with the general chairs Gerd Kortuem and Evangelos Niforatos (SDE), I contributed to many core parts of the conference organization, including budget planning, website building, as well as training and supervising the student volunteers. Lastly, as [Student Volunteer Chair](#) for the ACM Conference on Intelligent User Interfaces in 2019, I led a team of forty student volunteers to organize a conference with 300+ attendees and managed students' travel grant applications.
